

Project Design Phase-I Solution Architecture

Date	19 September 2022
Team ID	PNT2022TMID19453
Project Name	Smart Fashion Recommender Application
Maximum Marks	4 Marks

Solution Architecture:

We have developed a innovative solution in which you can do your online shopping.It can be done by using the chatbot.In this project we will be woking on two modules,

- Admin
- User

The chatbot sends message instantly to notify the offers and preferences.Instead of searching products ,this project influences the chatbots to gather all required preferences and recommend products to the user.
